

# Module 1 - Assignment Questions

- \*Adjust the response space according to what you need.
- \* For answers that include data to be answered via Metamask or Etherscan, include a screenshot, of the full screen, so that the facilitator can read the data on the screen, including the URL address of the web page.
  - What is the address of your new account? In addition to giving the answer include a screenshot.
     Also include a screenshot so that the facilitator can see, in the sale of the "Rinkeby Faucet", the
     URL of the Tweet or Facebook post that contains your wallet account address.

Convert Highlight Text	
Harris de elmant	
Hexadecimal	
49 6e 64 65 72	

3. As far as you can see, which block was last mined? In addition to giving the answer, include a screenshot.

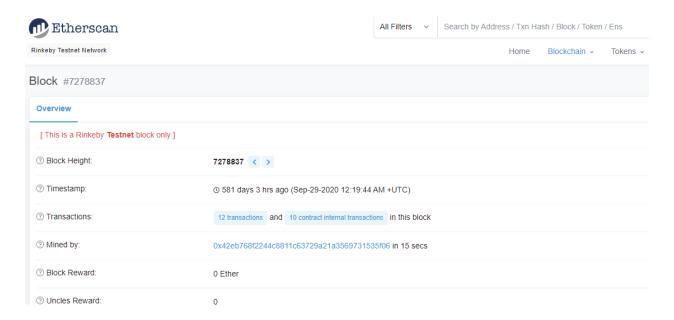

#### 10609704

4. How many transactions does block 7278837 have? In addition to giving the answer, include a screenshot.

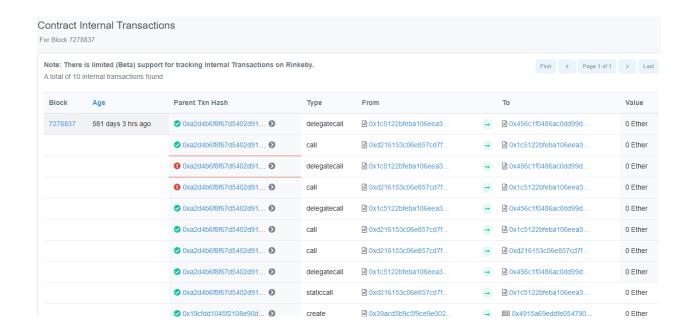

12 transactions

5. How many "contract transactions" does block 7278837 have? In addition to giving the answer, include a screenshot.

10 contract internal transactions

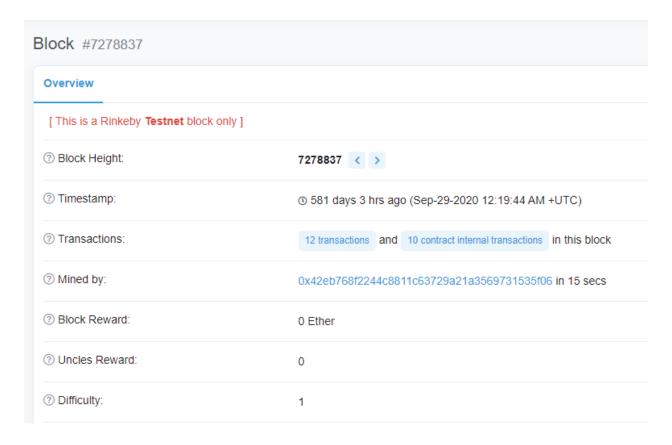

6. What is the "difficulty" of block 7278837? In addition to giving the answer, include a screenshot.

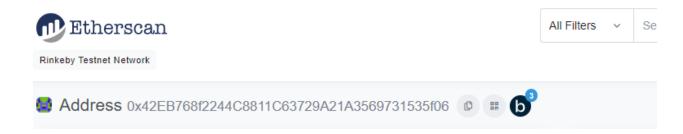

Difficulty level is 1

7. What is the address of the miner who has mined block 7278837? In addition to giving the answer, include a screenshot.

#### 0x42EB768f2244C8811C63729A21A3569731535f06

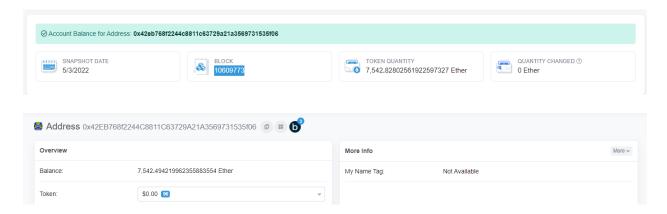

8. On the account you are researching at Etherscan, what can you notice about the owner? Based on data such as whether or not the account has a name, how much Ether it has, or what transactions it has been involved in, do you think the account belongs to a mining pool or an

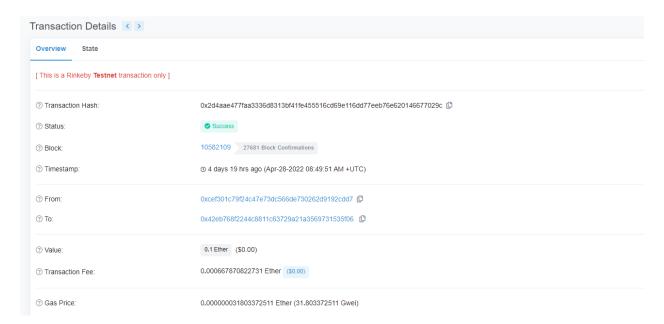

individual miner? What other predictions can be made about the account? In addition to giving the answer, include a screenshot.

Owner is no name its account balance is 7,542.82802561922597327 Ether and last block is 10609773

9. In the transaction you have opened, what is the hash of the transaction? In addition to giving the answer, include a screenshot.

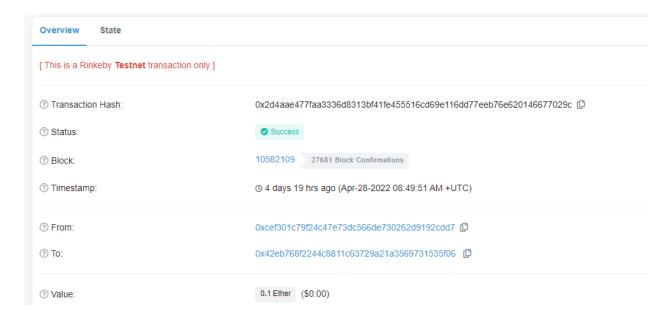

0x2d4aae477faa3336d8313bf41fe455516cd69e116dd77eeb76e620146677029c

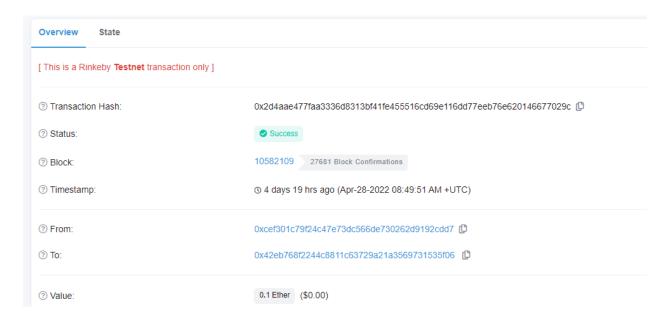

10. In the transaction you have opened, how much Ether has been transferred? In addition to giving the answer, include a screenshot.

#### 0.1 ether

11. What is the value of this Ether in US dollars? In addition to giving the answer, include a screenshot.

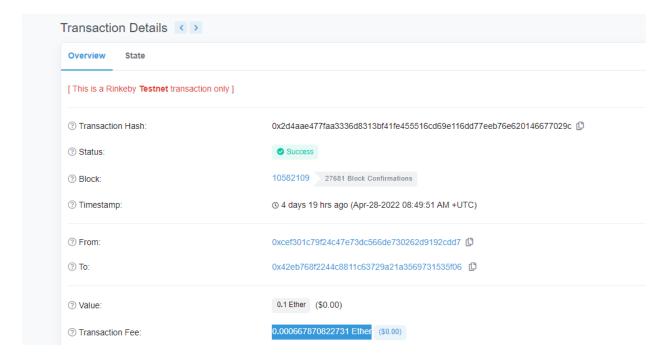

#### 0.00USD

12. How much was the transaction fee for this transaction (in Ether)? In addition to giving the answer, include a screenshot.

#### 0.000667870822731 Ether

13. What is the value of this transaction fee (it may be a fraction of a cent)? In addition to giving the answer, include a screenshot.

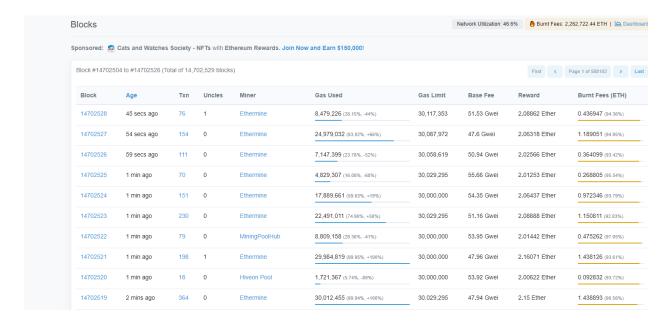

#### 0.00USD

14. From what you can see in this chart, what is the time between blocks in the Ethereum network? In addition to giving the answer, include a screenshot.

#### Under one minute

15. After a stable increase in time between blocks, the two dates with abrupt decreases are October 16, 2017 and February 28, 2019. Investigate these two dates in the Ethereum's history. Why are they important? What caused there to be an increase and, suddenly, a decrease in time between blocks?

# 2017

## **Byzantium**

Oct-16-2017 05:22:11 AM +UTC

Block number: <u>4,370,000</u>

ETH price: \$334.23 USD

ethereum.org on waybackmachine

### **Summary**

The Byzantium fork:

- Reduced block mining rewards from 5 to 3 ETH.
- Delayed the <u>difficulty bomb</u> by a year.
- Added ability to make non-state-changing calls to other contracts.
- Added certain cryptography methods to allow for <u>layer 2 scaling</u>.

# Constantinople

Feb-28-2019 07:52:04 PM +UTC

**ᢙ** Block number: <u>7,280,000</u>

ETH price: \$136.29 USD

ethereum.org on waybackmachine

## **Summary**

# The Constantinople fork:

- Ensured the blockchain didn't freeze before proof-of-stake was implemented.
- Optimised the gas cost of certain actions in the EVM.
- Added the ability to interact with addresses that haven't been created yet.
